## **Emergency Services Sector**

20. *August 13, Los Angeles Times* – (California) **Former L.A. County sheriff's captain agrees to plead guilty in jail scandal.** A retired Los Angeles County sheriff's captain entered into a plea agreement August 13 to plead guilty to lying on the stand, and agreed to cooperate with prosecutors regarding an ongoing case into the obstruction of a Federal investigation into excessive force and corruption at county jails. The ongoing case has resulted in seven convictions for obstructing a Federal investigation.  
Source: <http://www.latimes.com/local/lanow/la-me-ln-former-top-sheriff-s-official-agreement-jail-scandal-20150813-story.html>

## **Information Technology Sector**

21. *August 14, IDG News Service* – (International) **Google has another try at patching Stagefright flaw.** Google released a second update for a vulnerability affecting hundreds of millions of Android devices dubbed "Stagefright," after security researchers from Exodus Intelligence discovered that a maliciously crafted MP4 file could be used to bypass a previous fix for the issue.  
Source: <http://www.computerworld.com/article/2971061/security/google-has-another-try-at-patching-stagefright-flaw.html>
22. *August 14, Securityweek* – (International) **Apple releases patch for OS X vulnerability exploited in the wild.** Apple released security updates for OS X, iOS, Safari, and OS X Server, patching 135 vulnerabilities including a local privilege escalation zero-day vulnerability related to the DYLD\_PRINT\_TO\_FILE environment variable that attackers were exploiting in the wild to install adware and other questionable software.  
Source: <http://www.securityweek.com/apple-releases-patch-os-x-vulnerability-exploited-wild>
23. *August 13, SC Magazine* – (International) **Android ransomware locks up devices, has additional features.** Security researchers from Fortinet reported that the recently observed Android ransomware "Android/Locker.CB!tr" utilizes an FBI warning containing the user's picture and Internet Protocol (IP) address, and can send and intercept short message service (SMS) messages as well as access the device's contact list.  
Source: <http://www.scmagazine.com/android-ransomware-locks-up-devices-has-additional-features/article/432651/>
24. *August 13, Threatpost* – (International) **Zero day in Android's Google Admin app can bypass sandbox.** Security researchers from MWR Labs discovered a vulnerability in Android's Google Admin application on Android devices in which an attacker could use another application on the device to send a specific type of uniform resource locator (URL) to bypass the operating system's (OS) Same Origin Policy and get data from the Google Admin sandbox.
